## Professional summary

With over 10 years experience in Information Technology, specializing in IT support, manual testing, and automation testing, I have consistently delivered high-quality results for various organizations. I am now seeking a challenging opportunity where I can apply my expertise to drive team success. Expertise includes:

- Over 4 years of team leadership experience, leveraging communication and problem-solving skills to work between related teams, motivate and develop individuals, and achieve goals together.
- Experience in various domains such as Data pipeline, Migration data, SAP, ERP, E-commerce, Fulfilment service, and Healthcare,...
- Extensive expertise in Manual Testing of Client/Server, Web-based, and Mobile.
- Good experience in Test plan, Test strategy, Test cases, Test data, and Test execution,...
- Expertise in performing different kinds of testing like Sanity, Smoke, Regression, GUI, Functionality, Integration, and Performance.
- Take the course and work in the role of Automation tester for 6 months to design and create automation frameworks Java, Selenium, Cucumber, TestNG, Maven, and Jenkins,...
- Basic knowledge to use automation tool like Ranorex, Testsigma,...
- Good understanding of the Software Development Life Cycle (SDLC) like Agile, Waterfall.
- Good experience in API Testing and proficiency in using the Postman tool.
- Excellent knowledge of using Test Management Tools like Jira, Azure DevOps.
- Write SQL queries to extract from various source tables to perform Database Testing.
- Experience in Microsoft tools like Sharepoint, Planner, Teams, PowerAutomate, PowerBI,...
- Hands-on experience with AWS services for building, testing, and automating cloud-based data pipelines, including orchestration with Apache Airflow.
- Strong knowledge in data pipeline testing, covering ETL/ELT processes, data validation, and quality assurance across large-scale database environments (30+ schemas, 500+ tables).
- Applied AI to testing approaches for summary, researching technical, business, optimize test case design, test viewpoints, and ensure consistency in test case syntax.

## Work Experience

### HITACHI TEST CONSULTANT ENGINEER HITACHI DIGITAL SERVICES

Hitachi Digital Services Vietnam is the second largest delivery center of Hitachi Digital Services — a wholly owned subsidiary of Hitachi, Ltd. The company is a global systems integrator with over 24 years of operation in Vietnam, providing end-to-end digital transformation services including Cloud, Data, IoT, AI, and Managed Services for enterprise clients worldwide.

*Jan 2026 to Present*

Project: FUJIFILM IWpro RM/Print

- Description: FUJIFILM IWpro is a cloud-based platform for business digitization by FUJIFILM Business Innovation. The RM/Print module manages two areas: Resource Management (print device monitoring and cost control) and Print (cloud printing — upload documents and print on demand from any multifunction device).
- Team size: 11 members (1 PM, 2 BRSE, 6 DEV, 1 QC)

- Responsibilities:
  - Built test strategy and proposed the testing process for the RM/Print module.
  - Wrote and updated functional test cases and Sub System Testing (SST) scenarios based on latest requirements.
  - Executed test cases for functional, integration, and end-to-end scenarios.
  - Identified and documented defects; worked with developers to ensure timely fixes.
  - Reported quality status and test progress to the project team after each cycle.

#### Project: Demo for Laboratory Automation Platform

- Description: Built a proof-of-concept data pipeline system for a laboratory environment with AWS cloud. The demo focused on automating data ingestion and processing from lab equipment, helping the client understand how to improve data flow and quality.
- Team size: (1 PM, 1 BRSE, 6 DEV, 2 QC)
- Responsibilities:
  - Joined Q&A sessions to clarify requirements and understand the scope of the data pipeline demo.
  - Suggested test approaches and solutions based on experience in data pipeline and ETL testing.
  - Wrote and executed test cases to verify data ingestion and processing flows.
  - Prepared and delivered test report summarizing results, defects found, and quality status.
- Achievements:
  - Successfully deployed and demonstrated the data pipeline demo to the client, resulting in positive feedback and strong customer confidence in the team.
  - The client requested the team to continue developing the project into the next phase based on the quality delivered.

#### QC LEADER

#### FPT SOFTWARE

A leading global IT services provider headquartered in Vietnam, specializing in digital transformation, cloud, and data solutions for Fortune 500 clients.

*March 2024 to Jan 2026*

#### Project: Data Pipeline & Migration for a Top Japan Airline

- Description: Building the end-to-end quality assurance for a large-scale data pipeline and migration project, processing over 30 schemas and 500 tables. The project focused on securely migrating and transforming critical airline data to cloud-based platforms, enabling advanced analytics and operational efficiency.
- Team size: 26 members (2 PM, 2 COMTOR, 11 DEV, 10 QC, 1 QA).
- Responsibilities:
  - Led quality assurance team for ensuring high-quality complex data pipeline (data integration and transformation) and migration data on multiple projects.
  - Hands-on with AWS services and Apache Airflow for testing orchestrating, ETL/ELT workflows, optimizing reliability and efficiency.
  - Verified ETL/ELT process and validated data integrity on end databases including Snowflake and Amazon Redshift, ensuring accuracy and completeness across all migration stages.
  - Designed and implemented comprehensive test strategies for data projects, including estimation of testing effort and timelines.
  - Managed and coordinated activities across multiple small projects, maintaining consistent quality standards and timely delivery.
  - Applied AI approaches to summary requirement, research technical, enhance test case design, test viewpoints, and review test case syntax, improving coverage and efficiency.
  - Continuously expanded domain knowledge in airline data, cloud technologies, and advanced testing methodologies.

## **QA/QC LEADER**

### **LAIDON COMPANY**

Laidon Group provides consulting services and enterprise solutions for managing master data and data quality. Laidon, a Certified SAP Partner with offices in the US, Japan and Vietnam, created SimpleMDG product, which is an SAP BTP cloud-native application for Master Data Governance with over 50 out-of-the-box S/4HANA data models and workflows that support powerful governance while eliminating the need for slow, complex, and expensive customizations.

*March 2023 to March 2024 (1 year)*

Projects: simpleMDG (Master Data Governance).

- Description: We built a solution that simplifies SAP master data management for customer through seamless integration.
- Team size: 70 members (4 PM, 17 BA, 23 DEV, 11 ABAP, 15 QC).
- Responsibilities:
  - Lead a team of QA/QC engineers in designing and implementing quality control procedures across 10+ customers, significantly reducing defects in client deliveries.
  - Developed and maintained quality documentation, including test plan, test cases, checklist, testing reports, to track and address quality issues in a timely manner.
  - Collaborated with cross-functional teams to identify root causes of quality issues and implement corrective and preventive actions, leading to a improvement in overall product quality.
  - Working with the Product Owner (PO) to improve the new feature development process and project delivery to customers.
  - Enhance team management through strategic application of Microsoft tools, including Teams, SharePoint, Approvals, Power Automate, Power BI.
  - Collaborated analyzing reports from the Ranorex automation tool for UI testing. Additionally, implemented Postman for API testing, automating test data creation, and executing E2E flows.
  - Train and equip team members with the necessary testing mindset and skills, including test case development, execution, and defect reporting.
- Achievements:
  - Deployed the solution for over 10+ customers, and go-live successfully with 5 customer in year 2023.

## **QA/QC LEADER**

### **BASPRO COMPANY**

This is a technology company in the ecosystem of Dai Viet Group, which is one of the Top 500 Companies in Vietnam (VNR500). In addition, BASPRO provides a full package of order fulfillment and logistics services.

*October 2020 to March 2023 (2 years, 4 months)*

Projects: SC (Sell Connect- platform web), FOS (Fulfilment Operation System- platform web), DH (Delivery hub- platform web), LMD (Last mile delivery - platform web & mobile), DMS (Distribution Management System- platform web & mobile), WMS (Warehouse Management System- platform web & mobile), CRM (Customer Relationship Management- platform web), POS (Point of Sale system, platform web & mobile), DVGo (Management devices of customer, platform web).

- Description: We build the ecosystem to establish an integrated platform for e-commerce sellers to manage and expand their businesses to the world easily with: Omni-channel management, automate fulfill orders, and logistics services (shipping, payment, etc.).
- Team size: 15 members (1 PM, 2 BA, 9 DEV, 3 QC).
- Responsibilities:
  - Responsible for quality management for all projects.
  - Manage a team of 2 members to drive quality control, and ensure quality is built in from the start.
  - Participate in analysis, development/ improvement features as required by the operation team.
  - Create Test Strategies, Test Plans, and Test Cases and executed test cases.
  - Conduct Smoke Testing, Functional Testing, Non-functional Testing, Regression Testing, End to End Testing, and API Testing.
  - Write API automation test cases by using the Postman tool.
  - Perform Load Testing by using the K6 tool.
  - Mentoring team members through instruction, coaching and providing real-time on the job experiences.
  - Work with the developer to get the issue fixed soon.
  - Work with the partner to conduct End to End testing before integrating the system together.
  - Use test management tool like Azure DevOps.
  - Write basic queries (SQL, NoSQL) to extract data from various source to perform Database Testing.
  - Reported weekly status to management on a timely manner.
  - Achievements:
    - Building the product and going live in 8 months. The system works well with more than 6000 orders/ day.

### **QA/QC Engineer**

#### **TMA SOLUTIONS COMPANY**

One of the largest software outsourcing companies in Vietnam.

*May 2016 to October 2020 (4 years, 5 months)*

#### **Project: Vibrent Health**

- Description: The system is designed to allow participants to book an online health check-up appointment for most hospital systems across the United States by US government.
- Team size: 24 members (16 DEV, 8 QC).
- Platform: web application.
- Responsibilities:
  - Involvement in preparation of Test Procedures, Test Scenarios, Test Cases, Test Plans, Test Report and Test Data.
  - Perform Functional, Non-Functional and Regression Testing, End to End testing.
  - Execute SQL queries to verify data and prepare Test data.
  - Execute API testing by using Postman, and Jmeter tools.
  - Use test management tools: Jira, TestRail, and Zephyr.
  - Work on Agile methodology.
  - Work with the Designer, and PO to determine general UI standard, system improvement, and resolving gaps.

- Work with developers to troubleshoot or determine and resolve issues.
- Collaborate with the automation team to prepare test data, and test steps.
- Manage manual team of 2 members.
- Mentor new employees for joining the project.
- Share knowledge and experiences to team.
- Work with the role Automation tester for 6 month:
- Join the course for learning Automation test: Java programming language, Selenium, Cucumber.
- Perform automation test with knowledge: Java, Selenium, TestNG, Maven, Cucumber, Jenkins, Git.
- Manage the Automation team with team size 3 members: planning and assigning tasks, documentation, reviewing code, troubleshooting, coordination across teams, and reporting daily for stakeholders,...
- Achievements:
  - Star Performer Team Award in Quarter II – 2019
  - Star Performer Team Award in Quarter III-2018
  - Star Performer Team Award in Quarter II-2018
  - Good performer in QC's team – Quarter IV-2018

#### Project: Iron Mountain

- Description: This is a multi-phase project that will ultimately deliver on the Iron Cloud Portal for customers of Iron Mountain to register for and access the management and billing information of services (online or otherwise) that are offered by Iron Mountain.
- Platform: web application.
- Responsibilities:
  - Involvement in the preparation of Test Scenarios, Test Cases, Test Plans, Test Reports and Test Data.
  - Execute Functional, Non-Functional, and Regression Testing.
  - Support developers to debug by providing information and reproducing bugs together.
  - Use Test Management Tools: Jira, Testrail.
  - Daily report for Team Leader.

#### Project: Moso

- Description: MOSIONSOFT is a Gym Management Software.
- Platform: web application.
- Responsibilities:
  - Perform Functional and Non-Functional testing.
  - Test and describe bugs in Jira.
  - Design test cases, and test scenarios.
  - Daily report for Team Leader.

#### Project: Shearwater

- Description: This is a simulation program developed to deliver easy-to-use tools that will help you understand your organization's phishing risk, educate your staff, nurture awareness and prove success across your organization.
- Platform: web application.
- Responsibilities:
  - Test and describe bugs in the TMA Redmine bug-tracking tool.
  - Design test cases.
  - Daily report for Team Leader.

#### Project: Rank Media

- Description: This project uses the Magento e-commerce platform to build a website for selling baby clothes.
- Platform: web application.

- Responsibilities:
  - Involved in Functional Testing, GUI Testing, and Compatibility Testing for Mobile Devices (Samsung Galaxy S4, iPhone 6 plus ...).
  - Test and describe bugs in the TMA Redmine bug tracking tool.
  - Design test cases.
  - Support developers to debug by providing information and reproducing bugs together.
  - Daily report for QC Manager.

Project: Contact Management

- Description: A module to manage information and history for customers
- Team size: 3 members.
- Platform: WinForms application.
- Responsibilities:
  - Design test cases.
  - Test and describe bugs in the TMA Redmine bug tracking tool.
  - Weekly report for Team Leader.

### IT Support

#### VNG CORP COMPANY

VNG Corporation is a technology company, founded in 2004, specializing in digital content and online entertainment, social networking, and e-commerce. It focuses on four main businesses, including online games, platforms, digital payments and cloud services.

*Feb 2012 to Apr 2016 (4 years, 2 months)*

- Responsibilities:
  - Responsible for supporting end-user such as networking, troubleshooting error, installation operation, and maintenance services.
  - Training new IT employees.
  - Deploy and operate Gsuite, SCCM...
  - Document guide for end-user.
  - Reporting to IT manager.

## Skills

Hard skills:

- Manual Testing.
- Automation Testing: Selenium, Cucumber, TestNG, Maven, Jenkins,...
- Programming language: Java, Javascript.
- Version control: Git.
- API Testing: Swagger UI, Postman, Jmeter.
- Performance Testing: Kó, Jmeter.
- SQL: MySQL, Postgres, Mongo.
- Test Management Tool: Jira, Azure DevOps.

Soft skills:

- Communication.
- Organized & proactive.
- Problem-solving.
- Positive attitude.
- Fast learner & passionate to learn new technologies.
- Teamwork.
- Knowledge sharing and mentoring.

## Education History

### **Automation FC**

Fullstack Selenium in Java(Basic to Advance) Course

*Year of Graduation: 2020*

### **TVN Testing**

Fresher Tester Certificate

*Year of Graduation: 2016*

### **Computer Science Center, University of Natural Sciences, Vietnam National University – HCM City**

Cisco Certified Network Associate – CCNA

Microsoft Certified Solutions Associate – MCSA

*Year of Graduation: 2014*

### **University of Industry – HCM City**

Bachelor's Degree, major in IT Networking

*Year of Graduation: 2012*

## Hobbies

Football, Game, China chess.
